

There are many applications for these simple, economical and reliable blocks. Loop head blocks can be attached directly

to rope, while other blocks are attached with shackles.

Stainless Steel cheeks and Acetal sheaves ensure a long service life with virtually no maintenance.

These light weight blocks are often used for light duty purchase systems such as dinghy boom vang, cunninghams, leech line tackles, bunk adjusters, etc. V-jam blocks allow fast, sure cleating of control lines.

#### FEATURES

- ▶ Light weight
- ▶ Economical
- ▶ Maintenance free

Hollow rivets in the block heads can be fitted with shackles, which can also be used to add a becket for extra purchase.

#### MATERIALS

- ▶ UV stabilised Acetal sheaves
- ▶ Grade 316 Stainless Steel cheeks

▶ RF806S – 4.8mm (3/16") pin suits RF662

▶ RF807 – 4.8mm (3/16") pin suits single and fiddle blocks
