

RF5101, RF5106
Becket take-off
for simple 2:1
purchase system

V-Cleats are a simple solution to cleating lines under moderate loads. Pressure moulded from a Teflon® impregnated composite material containing glass and carbon fibres, they are lightweight, corrosion proof and offer greater abrasion resistance than ordinary plastics.

The sleek, low profile of the V-cleat is unobtrusive on the deck and will not catch lines or clothing. The base profile permits mounting on flat or curved surfaces. The cut-away in the base of the fairlead cleats can be used as a becket for a simple 2:1 purchase system.

Accessory kits contain wedges for 10° inclination and backing plates suitable for use with screws or nuts that can also be used as risers or deck mounting pads.

The RF5121 trapeze Clamcleat® incorporates a roller for easy 2:1 adjustment.

PRODUCT No.	DESCRIPTION	FASTENER SIZE		HOLE SPACINGS		ROPE SIZE		WEIGHT	
		mm	(in.)	mm	(in.)	mm	(in.)	g	(oz)

RF5162	V-Cleat Accessory Kit, medium	-	-	-	-	-	-	47	(1.7)

The RF1398 rope stopper incorporates a cam and locking mechanism for automatic control when drawing the line through with the lever closed. The spring assisted lever permits fast, positive release. Suitable for 8mm to 10mm (5/16" to 3/8") rope and for

loads up to 400kg (880lbs) it can be easily installed in banks of two or more. The RF1398H handle kit contains three interchangeable handles in red, green and blue for instant identification of control lines.

The rope stopper has a Stainless Steel frame and a ribbed extruded Aluminium cam and base plate. The handle is moulded from tough, fibre reinforced composite.

Other fittings for securing control lines include horn cleats and jammers.

CLEATS

Complete trapeze systems can be assembled from these accessories, including the RF5121 trapeze Clamcleat®.

Tie-balls are a convenient way to terminate control lines while also providing a convenient,

textured grip for pulling. They have a recess in one side to contain the stop knot, and are available in several colours for quick identification.

Toe strap (hiking strap) plates suit 50mm (2") webbing. [25mm (1") for PNP69B]

PRODUCT No.	DESCRIPTION	WEIGHT	
		g	(oz)
PNP50	Flat saddle, suits 25mm (1") webbing	2	(0.07)
PNP51	Flat saddle, suits 50mm (2") webbing	9	(0.3)
