

**FEATURES**

- ▶ The patented extruded hole design provides up to 14:1 holding power.
- ▶ On-Off switch is fitted to both sides of block so it can be used on port or starboard side. One of the switches can be removed if desired.
- ▶ Unique On-Off switch mechanism can be operated under load.
- ▶ Swivel head post can be locked at 0 or 90 degrees with optional grub screw kit, RF62100S.
- ▶ Pivoting Lead blocks maintain alignment and keep lines as close to the deck as possible.
- ▶ Ratchet blocks can be disassembled for servicing or customisation.
- ▶ Stand-up spring kits and padeyes add functionality to the range.

RF62100S	Head post locking kit	-	-	-	-	-	-	-	-	-	-	1	(0.1)

#### APPLICATIONS

- ▶ Dinghy mainsheets on boats such as Laser, 470, 49er and other leading racing dinghies. The RF62100 is standard equipment on the Laser XD, Winner Optimist, and other leading racing dinghies.
- ▶ Sportsboat mainsheet systems using RF7 or RF8 mainsheet swivel cleat units – see page 71 for details.
- ▶ Spinnaker sheets on dinghies, especially modern asymmetric classes (49er, 29er, RS-700, RS-800, B14, etc.)
- ▶ Sportsboat and small keel boat spinnaker sheets (lateral lead blocks).
- ▶ Vang, mainsheet traveller and other control line applications on larger yachts.

#### MATERIALS

- ▶ Carbon black Acetal ball bearings.
- ▶ Alloy sheave and cheek plates.
- ▶ Torton® ratchet pawl.
- ▶ Grade 316 stainless steel forged shackle.
